

CHOREOGRAPHER

The Choreographer works to create the Director's vision through the movement of the musical – they must work closely with the Director.

- **The Choreographer is responsible for designing dances that may be needed and teaching them to the cast.**
- **Most of the dances that are used should be fairly simple and easy to learn.**
- **The director will usually have a vision of what the dance should look like, where it should take place, and so on**
- **The choreographer's responsibility is to make that vision happen on stage.**
