

MAKE-UP ARTIST

The Make-up Artist is responsible for ensuring that we have the proper make-up for the cast and that they know how to apply it.

- The Make-up Artist is crucial to the success of a theatrical production. They will help transform the cast and bring the vision of the script writer to life with the use of stage and special effects makeup.
- They usually implement special make-up effects (such as age, animals or ghosts) while helping teach the cast members how to do their own basic makeup.
- The Make-up artist will include the following: Director's vision, mediums used, cast size, budget, purchasing orders, stage makeup creating the character breakdowns, makeup profile charts for cast, venue and size, seating and lighting, hygiene and sanitation.
